### **DETAILED ACTION**

1. The Examiner has carefully considered Applicant's amendments and accompanying remarks filed September 15, 2009. In view of Applicant's response, the previously set forth rejection in view of Broadway (US 2004/0224584) have been withdrawn. However, after an updated search, additional prior art has been found which renders the invention as currently claimed unpatentable for reasons herein.
2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

4. Claims 2-11 and 21-25 are rejected under 35 U.S.C. 102(e) as being anticipated by Christou et al. (FR 0315269). Christou et al. (FR 0315269) disclose a mesh comprising glass yarns (abstract). Please use US 2005/0159058 as a translation for FR 0315269. Christou et al. disclose that it is well known to make a mesh made from glass yarns first coated with PVC and then weaving (i.e. woven) the coated yarns [0003]. The mesh can also be made of two sheets of glass yarn superposed onto one another without being woven together, with the two sheets being bonded together in any appropriate manner (e.g. adhesive) [0012]. The mesh is made from glass yarns and can be coated with an acrylic or vinyl binder associated with polyurethane [0019]. The mesh is used for producing curtains or blinds for use on windows. The purpose of such curtains or blinds is generally to attenuate the passage of light under very bright conditions and to serve as a sort of screen [0002]. The deposited coating weight ranges from 15-18 gsm [0116]. The polymer coating is a multilayer coating [0020]. The coating layers impart color, protection, and opacity [0025]. Regarding the limitation of a dry-lay heat bond, the method of forming the device is not germane to the issue of patentability of the device itself. Therefore, this limitation has no been given patentable weight.

### ***Conclusion***

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the

mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
